About MC Brands, LLC

Originally founded in 2010, incredible brand cannabis edibles and extracts has grown into one of Colorado's highest-volume, and the most awarded, infused product companies in the country. This is a direct result of our reputation for extract quality and product innovation. incredible has invested in long-term growth and, as a result, has solidified its position as a leader in consistency; reliably delivering in the fields of product safety, extraction purity, ingredient quality, consistent dosing and consumer packaging.

MC Brands, the parent company of the incredible brands, and was founded by Bob Eschino and Rick Scarpello to bring professional and consistent edibles to the cannabis marketplace. With a combined 40 years in business development and food production expertise, incredible's mission is to advocate through our work to help propel the cannabis industry forward. incredible leads through example to fight for safe consumer access and medical cannabis research by investing in product quality and production safety. Featuring a full line of THC-infused terpene-rich artisanal edibles, the incredible brand continues to lead the industry in innovative edibles, chocolates, ePens, concentrates, gummies, wellness products and CBD products. The incredible brand promise is that every product undergoes rigorous testing ensuring consistency in potency and in delivering the highest levels of food production safety. We will continue to help propel cannabis innovation by introducing new edibles and continuing to focus on food safety, dosing consistency, child-proof packaging and government relations thought leadership.

In 2014, a lack of large-scale hydrocarbon extraction solutions initiated the development and subsequent launch of incredible Extracts and incredible Extractors. Using only terpene-rich genetics and a proprietary closed-loop hydrocarbon extraction system, the incredible promise is to always deliver a consistent experience made with high-quality ingredients.

In 2018, MC Brands introduced several innovative new products in our incredible Wellness line. We're going back to our roots with medicine-based products like tinctures, suppositories, and bath salts (arriving in early 2019!)

Also in 2019, our incredible CBD line, with CBD-only products, will be expanding with candy bars, tincture, gummies, bath salts, and vape pens.
